

BROADPOWER

About Broad Power Ltd

Broad Power is a family-run company that works hard to develop close bonds with our employees, customers and suppliers. We believe this leads to strong communications and relationships built on trust and mutual respect.

Located in Rural Dorset, our offices, production and warehouse are linked together in an idyllic setting which helps inspire new ideas and develop new ways to help Broad Power become even more environmentally conscious.

We offer a comprehensive range of BS6396 power and data modules, cable management, task lighting, flat screen monitor arms and CPU holders to solve all your desking requirements.

We continuously develop and adapt our range of products to keep pace with modern desking, quality and safety requirements.

Our experience and industry knowledge enables us to advise on many industry issues, such as BS6396, BS5733, BS7671 and all other safety and technical guidelines associated with office electrics.

Our power and data modules adhere to BS5733 standards, ensuring safety and reliability. Our manufacturing facility is ISO9001 certified, demonstrating our commitment to quality and efficient production processes.

Certificates and Testing

- To ensure compliance with the latest industry standards, we collaborate with nationally recognized testing laboratories to conduct thorough product testing. This enables us to guarantee that our products meet the highest quality and safety requirements in the market.
- Our products have undergone rigorous testing by renowned testing laboratories such as BSI, Kema, UL, BIS, and others. These comprehensive tests ensure that our products meet the strict standards set by these organizations, guaranteeing their safety, reliability, and adherence to industry regulations.
- Broad Power holds ISO9001 registration, demonstrating our commitment to maintaining high-quality standards across our operations. This certification validates our adherence to the internationally recognized ISO9001 standard for effective quality management systems.

International Sockets

We offer a wide range of power sockets, featuring over 24 international socket options, providing versatility and compatibility with various plug types from around the world.

The new universal socket now available to order.

Below Desk Power

Oblique

An affordable modular power & data system, perfect for an expanding business with it's 3PP interconnective capabilities.

The Oblique range is an electrical power system which is available in two, three and four way outlet options.

The Oblique range is made from a high grade plastic material. Each version can be supplied with a variety of switch options as well as fuse options.

Alpha

The sleek, minimalist styling of the Alpha offers a clean and functional presence with an almost limitless selection of customizable options.

The Alpha features a swiveling cable exit that allows for a 90° range of orientation, extending cable life by relieving cable stress, and allowing the cable to exit in the best suited position.

The body of the unit is manufactured from high quality, extruded aluminium, making it very durable.

V Dock

The V Dock is a simple under desk mounted, dual faceted boardroom power unit that can be concealed by any cover of the user's design.

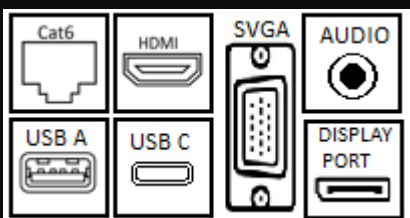

The unit is fastened to the underside of the work surface under a pre-cut aperture. This unique power unit gives the option to use the cut-out part of the work surface as the lid.

The V-Dock can house almost any configuration and customers can choose between a solid base, rubber flap or bristle base to allow cables to enter or exit the unit from below.

- Aluminum Extrusion in White, Black or Silver
- Socket colour in White, Black or Grey
- 30W, 65W or 100W USB type C options

Data / AV options

Protea

The Protea above desk power and data unit has been designed to fit in with today's contemporary office desking and design.

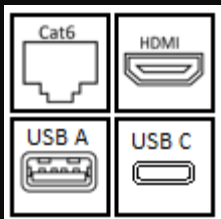

A modular aluminum-based workstation power outlet system that is completely customizable, with the user able to specify the exact number and type of power, voice/data, switches and protection devices they require.

The layout, configuration and colours can also be ordered to suit individual requirements.

The Protea is designed with ease of use and accessibility in mind a perfect solution for an "active working" or communal office environment .

- Multiple desk mounting options available
- Aluminum Extrusion in White, Black or Silver
- Socket colour in White, Black or Grey
- 30W , 65W or 100W USB type C options

Data / AV options

Gemini

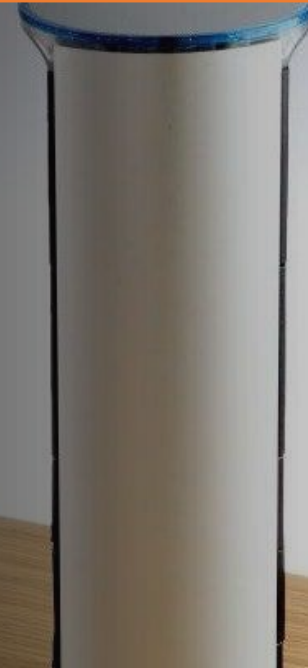

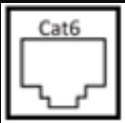

Enhance any domestic or office environment with the sleek, metallic finish and striking LED accents of the dual-sided, pop-up Gemini Power-Tower.

When the LED-lit centre ring of the unit is pressed down, it raises itself from the work surface with a gas strut. This provides access to power outlets and peripherals.

Features a double-sided design and an ultra-smooth gas strut mechanism that automatically raises the unit from its flush-mounted position. After use, it can be stowed away by pushing down within the illuminated ring, until the power unit clicks conveniently into place below the work surface.

- The desk collar has been engineered for strength with an easy-to-screw thread that aids in quick and easy installation of the unit.
- The collar of the unit is padded with a high density foam ring to help secure it in place without damaging the work surface.
- An illuminated blue ring indicates that the unit is powered.
- Single sided option also available.

Optional Cat6

Custom Design

Client: Large International Company with offices in the US, Europe and the UK

Design Brief: Desk top power module with clamp fixing. Sockets to enable staff and visitors from the US and Europe to connect their own laptops without the need for travel plugs/convertors. To also include Dual USB Type A Charging points

The Product: The slimline Orion desk top power module was customised to include 2 no. UK Sockets, 1 no. European Socket with Dual USB Type A charging ports to be fed from a 2mtr hardwired drop lead to a UK Plug and plugged in to floor mounted 240V supply power box.

A US Socket to be fed via a separate 2mtr 14AWG drop lead to colour coded connector and connected a custom made transformer module to be housed below a cluster of 6 desks.

Custom made transformer with 6 colour coded connector outlets converts 240V supply to 120V with thermal Reset Switch protection

At Broad Power Solutions, we are proud of our long history of working with furniture companies and end users to create custom products that provide comprehensive and unique solutions tailored to environments globally.

With over 20 years of experience, we can provide expertise on complex furniture solutions across multiple industries such as workplaces, hospitality, kitchens, and control rooms. We can provide tailored solutions optimised to create the best possible user experience.
