The best of Brazilian furniture.

DELUCCI FURNITURE

Much more than the delivery of a good or service, corporate markets have been preparing to deliver unique experiences to their customers. We know that the atmosphere of each environment is fundamental in this process and it is with our furniture pieces that we want to help you on this journey.

To this end, we are dedicated to the development and production of pieces that combine design, resistance, lightness and construction quality, always considering the natural beauty of wood and the functionality of the piece. Our 2,400m² manufacturing park has advanced furniture technology machinery, which allows us to work with wood in a way that is rarely seen in large-scale production.

With a focus on the differentiated engineering of each piece, on production consistency and specialized service to the demands of the corporate market, we intend to be part of your choices in the ambiance of the spaces of your enterprise.

CHOOSE US

When in addition to form, function over time is relevant in the useful life of a piece of furniture, some details are more than important.

When specifying Delucci furniture for your business,
You also choose to:

- **Pieces constructed exclusively from certified wood, 100% in accordance with environmental and derivative standards of noble species such as Jequitibá and Tauari;**
 - High-performance construction engineering, with intelligent fitting and locking systems for greater stability and resistance of the furniture;
 - Cutting-edge furniture technology combined with specialized labor. Productive consistency obtained by the precision of the CNC machining center and hydraulic assembly presses associated with the delicacy of manual finishing;
 - Ability to achieve special curves, angles and finishes, which can only be obtained from solid blocks of wood, such as chamfered blocks in different thicknesses and organic shapes such as "river stone";
 - Structure of chairs, stools and armchairs, tops and table legs made of 100% solid wood (unless otherwise indicated);
 - Superior standard raw materials and inputs such as high-resilience foams, high-hardness varnishes, dyes and special hardware, among other items;
 - Application of top-notch coatings, including leather and fabrics from suppliers renowned for their quality and straws from the premium segment that have aramid in their composition, increasing the resistance of the pieces;
 - Specialized service, from product engineering to support in special projects to after-sales support.
- When specifying Delucci furniture for your business, you also choose:
