TIPS FOR HEALTHY SITTING

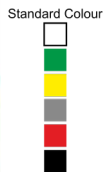

- * Sit up with back straight, shoulders back and keep your feet flat on the floor
- * Body weight should be distributed evenly on both the buttocks & it should touch the back of the chair
- * Avoid sitting in the same position for more than 30 minutes
- * The monitor should be directly in front of the user and it should be at an arm's length, with top of the screen at eye level
- * Keyboard should be placed in front while typing & a gap of about four to six inches (100-150 mm) should be left at the front of the desk to rest the wrists
- * Elbows should stay close to the body
- * Feet should be fully supported by the floor or a footrest may be used if the desk height is not adjustable
- * Back should be fully supported with appropriate lumbar support when sitting vertical or leaning back slightly
- * Thighs and hips should be supported by a well - padded seat. placed parallel to the floor
- * Knees & hips should be about at the same high with the feet slightly forward
- * While working, looking into the distance or even just closing your eyes in a regular interval also gives your eyes a break. "This is total relaxation for your eyes"
