轨道安装说明 INSTRUCTIONS FOR RAIL INSTALLATION

- 1.安装前确定好安装位置,如天花板厚度比较厚承受力强,可直接将轨道用自攻螺丝固定在天花板上。
 - 2.天花板承受力和稳定性比较差的情况下,需在房顶安装挂钩,在挂钩上吊拉丝捆绑木方加固。
 - 3.木方垂直的位置需事先确定好,木方应垂直平行于天花板背面。
 - 4.安装轨道时,应揭开安装位置周围天花板,观察加固木方位置是否与轨道安装位置吻合。
 - 5.最后用自攻螺丝固定轨道,并将天花板安放好。
- 1.Determine the installation position before installation. If the ceiling is thick and has strong load-bearing capacity, the rail can be directly fixed to the ceiling with self tapping screws.
- 2.In cases where the ceiling has poor load-bearing capacity and stability, it is necessary to install hooks on the roof, and hang wire and tie wooden blocks on the hooks for reinforcement.
- 3.The position of the wooden block for hanging needs to be determined in advance, and the wooden block should be perpendicular and parallel to the back of the ceiling.
4. When installing the rail, the ceiling around the installation position should be lifted and the position of the reinforced wooden blocks should be observed to match the installation position of the track.
- 5.Finally, fix the rail with self tapping screws and place the ceiling in place.
