Hybrid

**Offers plenty of options
to set up your office well.
Whether you want to stand or
sit, there is always something
suitable.**

MARKANT

Activity Based Working

Freedom to work where and when you want is becoming more and more common place. In addition, our working environment and our work are constantly changing as a result of technical innovations. In order to respond to this as a forward-looking office, it is important to no longer just think about how many people need to be housed, but most importantly about the tasks that these people are going to perform in the office and how the office space can best respond to this. These tasks are becoming more varied. Collaboration is becoming increasingly important and so is finding a quiet place for a task that requires focus.

Because it is becoming increasingly normal to work remotely, partly as a result of technological developments, the role of the office is changing more and more to that of an inspiring meeting place. A place that is used to develop new ideas and create new partnerships.

This is why we have developed our programme especially for this purpose. With Hybrid it is possible to create different workplaces for different tasks within a coherent design.

Meeting

What do you need today?

Standing or sitting? Working alone or together? Formal or informal?
There is always a workspace to meet your needs.

Sit-to-stand Workstations

Our Max Hybrid workstations can be put together in various ways so that they integrate perfectly into the office design, and can be adapted later on. The screens can easily be replaced. The frame of the Max Hybrid workstation has room for all common charge points, which gives the desk a neat appearance.

Meeting

A meeting room: an ideal place to move forward together, make plans, exchange ideas, progress as a team, or improve each other. This deserves attention. Every meeting room is different. Therefore, we offer various collections. Which one fits your (new) meeting style?

Modular soft seating

The soft seating is suitable for different tasks in different setups. Thanks to the modular concept, the elements can be combined endlessly and expanded later on. With integrated tables and plug points or larger conference tables, the soft seating can be extended to a fully-fledged meeting room.

Simply the best sit-to-stand desk.

Wing sit-to-stand workstation

The wing desk offers the perfect ergonomics for a sit-to-stand workspace. The patented shape of the desktop workspace provides the best support for the upper body in both sitting and standing position and ensures that people are seated in the right position. In addition, the shape allows optimum use of the available desktop workspace.

Articulated arm

Routing segregated charging and data cables from the desktop workspace to the cable tray below the wall.

Ergo Curve

For better arm support in both sitting and standing positions, making the armrests of the office chair unnecessary.

Max Hybrid

With the maple wood finish on the leg, the Hybrid desk series seamlessly blends with the Hybrid benches.

Max T-range

Stable, but also minimalist. With the T leg, you can create an open and exposed view of the workspace.

Max Screen range

A type of workspace where you can concentrate well. Together with the side walls, which are 120 cm high, these legs fit perfectly on the frame. This ensures whole fitting.

Max Panel range

Panel range provide a soothing and neat appearance.

Meetings

Meetings are an important part of our office culture. Adding a conference table to the open-plan office makes the conference room easily accessible. Together with our Hybrid conference table, it becomes more beautifully integrated.

Do you want to keep your meetings more active and healthy? Then, take a standing conference table. This is because our brains work harder when we're standing up. It helps us to be more efficient, creative and fully participated in the meeting.

Hybrid Seating

Hybrid soft seating consists of a wide range of modular elements that can be combined to form a variety that exactly matches the desired situation. Like the desks, the legs are made of natural wood, black or white, and the sofa itself can be fabric padded in almost any conceivable fabric. Different fabrics can also be combined for a unique look.

Personal productivity

The integrated worktop of Hybrid optimally support Activity-Based Working. Sliding and moving the top towards the user creates a comfortable work spot just like a business seat on your favorite airline, adaptable to different users. In the front, a standard power socket with an extra USB port is integrated together.

Spontaneous collaboration

By sliding the pivot tops to the front and rotating 180 degrees, the table top can change into a small meeting table, ideally positioned when you like to share your laptop screen with the person next to you.

Private communication

The high fabric padded backrest simultaneously absorbs and blocks the sound of a phone call or conversations with a colleague. At the same time these people benefit from being separated from the disturbing noise of the surroundings.

Create your own unique environment

Wing Seaters

The 120-degree open Wing Seater creates the perfect setting for a spontaneous meeting with a colleague or a short individual work session where people still can be visible to one another, but benefit from the privacy and acoustics of the high backrest.

Idea starters

In order to help you on your journey, our designers have set to work. You can use these examples as inspiration to create your own unique design or simply order one of these setups.
