

A person is shown from the side, sitting at a desk. They are wearing a light-colored button-down shirt and a watch on their left wrist. Their left hand is resting on the desk, and their right hand is holding a smartphone. On the desk, there is a laptop, a small cup on a saucer, and a glass of water. The background is dark and out of focus.

MOx

With MOx, Markant introduces an exceptionally intelligent and contemporary furniture range. Clean, businesslike and technically perfectly executed. With the floating desktop and a slender base the MOx obtains its refined look. The symmetrical interplay of lines between the worktop and the undercarriage provides structure and peace of mind on the work floor.

MOx fits perfectly in a dynamic working environment. The nature of the organisation and the activities that take place there have a major influence on the final choice of furniture. MOx allows an infinite number of office configurations, team workstations and meeting tables are put together. Due to this wide applicability, the entire office can be furnished with MOx. This creates a homogenous image in the office.

MOx always offers a suitable solution.

- › Timeless design
- › For a modern and dynamic office
- › Height adjustment with intelligent click mechanism
- › Available in white, silver and black
- › Also available in a management version

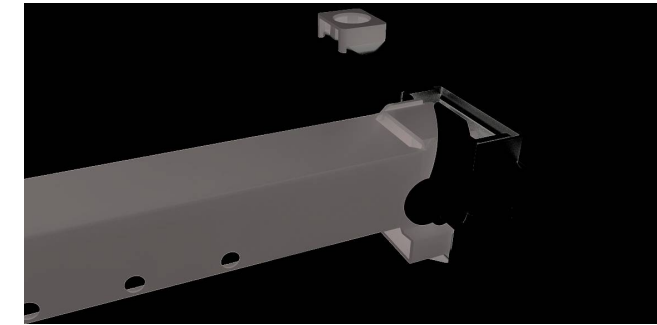

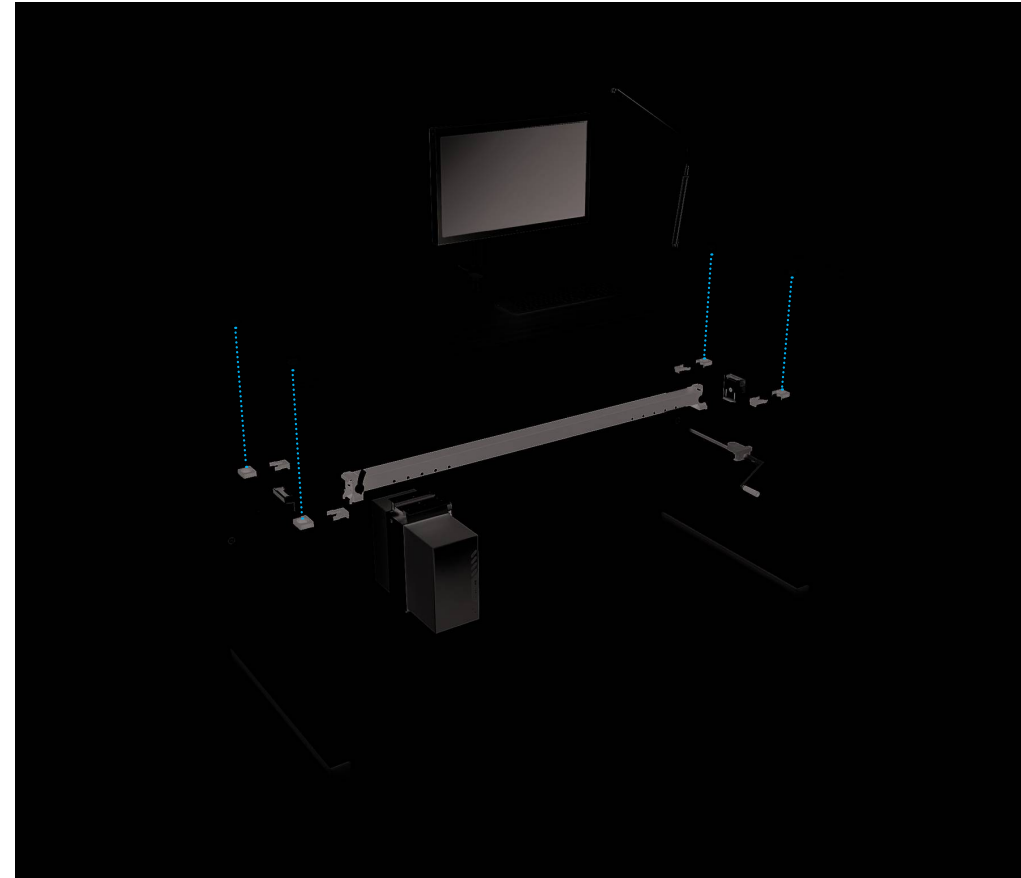

Design MOx

The bases of MOx, the 4-leg and the O-leg, are made of a high quality steel tube profile of 70 x 30 mm. This profile gives MOx its tough and industrial look. The base is constructed entirely from mono-materials, making MOx highly recyclable at the end of its life cycle.

Together with the development of MOx, a completely new frame was also designed. The new universal and modular construction is a further development of the renowned 'Markant System Architecture'. It is therefore not only applicable to MOx, but will also become the standard for all existing and future Markant furniture lines. The intelligent design of the beams makes it possible to install MOx completely without tools.

- › Toolless
- › MSA +
- › Quick assembly
- › Easy to adjust

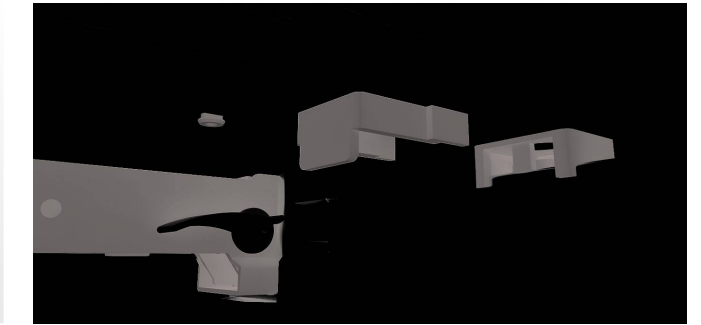

MOx Assembly

Fast and tool-free assembly! MOx is Markant's first furniture range with the new Markant System Architecture (MSA).

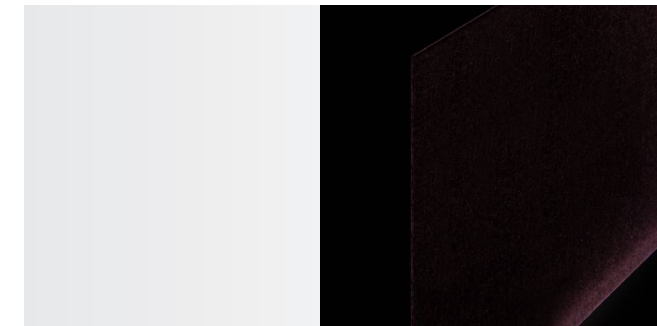

Readability Height Adjustment

The window in the leg ensures a clear readability of the set height. The adjustment range is from 61 to 85 cm.

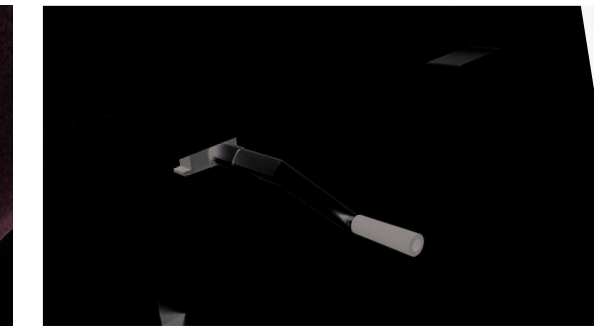

MOx Eco-fits

The patented ECO-fits ensure tool-free assembly of the worktop and accessories to the frame.

Functionality and Accessories

The functionality of the workplace can be increased by adding accessories as cable management solutions and partition walls.

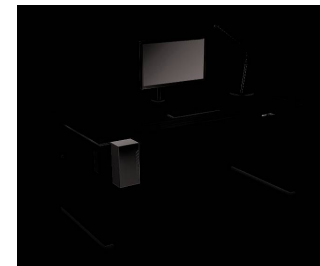

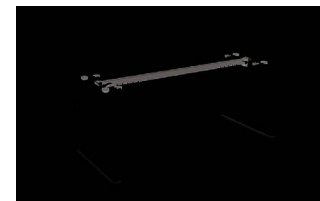

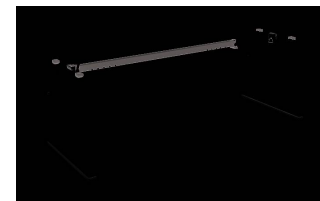

Height adjustments

Permanent height adjustment with the foldable crank handle or optionally with the electric motor and digital display. With the 'click' control, the workstation can be adjusted to the required height without tools. MOx is also available at a fixed height of 75 cm for conference solutions.

Paint- and top colours

MOx is available with a white, silver or black frame. If desired, a top in almost any color or wood decor can be placed on top

Versions

Thanks to the many leg variants, an infinite number of desks, team workstations and meeting tables can be put together. The MOx design is sleek, businesslike and technically perfect.

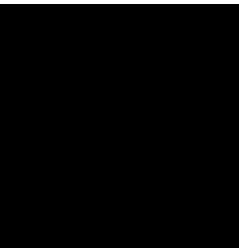

The different legs can be made as fixed height, height adjustable with socket, height adjustable with crank or electric. Even the smart click system is available for the MOxO. This allows you to always choose the desired height for your workstation or set it yourself.

Thanks to the timeless design, an office environment with MOx always remains up-to-date.

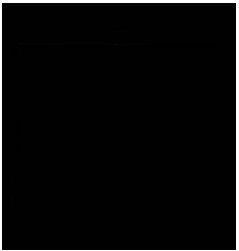

Available frame colours

Available frame colours are white, silver and black.
For the desk tops, a variety of colours and wood decors is possible.

- › White RAL 9010
- › Black RAL 9005
- › Silver RAL 9006
